

**Brookes
Education Group**

Unlock Your Potential

Premier Global School Network

Pillars

Character

Character building is the overriding strategy we use to support each student as they strive to become a better person. At Brookes Education Group, we believe building character is based on skills that can be learned; skills we can teach, skills that we can observe and skills that can be improved over time. Students will become better people as they learn how to listen actively, how to communicate effectively, and how to gain trust by building community.

Connectivity

We strengthen our exceptional educational environments by connecting our students and campuses around the world. We provide greater opportunities for our students and teachers to learn about the world from the world and to experience exceptional education in different environments by connecting our campuses. We recognize that academic learning is strengthened through connections to experiences in the real world, and our students learn how to apply their learning in different contexts and across different cultures.

Through our network of schools, we are connected to local and global communities. We actively engage our students on important global issues which transcend cultures and societies.

Creativity

We believe that the challenges our students will face throughout their lives will best be met with a spirit of curiosity and inquiry, and a skilled application of creative problem solving.

Creativity is vital for adapting to and thriving in a changing society. Every day, new technologies are developed, new challenges arise, and new opportunities emerge. Students need to be prepared to recognize and respond to these changes. Creative thinking and innovation are skills that can be learned and at Brookes Education Group, we strive to create environments that constantly challenge students to develop these skills.

Divergent thinking is incorporated into all aspects of learning. Students learn to see an issue from different cultural perspectives, and are equipped with critical thinking skills, and an open-mind.

Mission

Students are supported in a caring environment and given opportunities to learn about themselves and to take action in areas in which they are passionate. Our students and teachers come from diverse backgrounds and we connect globally with our other campuses to learn about the world, from the world.

We inspire and teach students about global issues by connecting ideas and stories locally. We strive to use our environment as a tool and a canvas for learning and action.

Vision and Values

Our vision is to create a world of self-confident lifelong learners connected and inspired to help others.

Through leadership challenges and opportunities, we help students discover their passion, develop their character, and understand their connection to others and society. We espouse creativity, build character and develop connections to deliver exceptional educational learning experiences.

One Powerful Global Network of Learning

Inspire, Empower & Watch Them Soar
